

Liberate the pain of human inspection on manufacturing by using AI.

# Hutzper

A background image showing a pair of hands holding a smartphone, with the image being dark and semi-transparent. The text is overlaid on this background.

**95%** of the  
manufacturing industry in Japan  
is understaffed.

Labor shortage is a  
**BIG challenge**

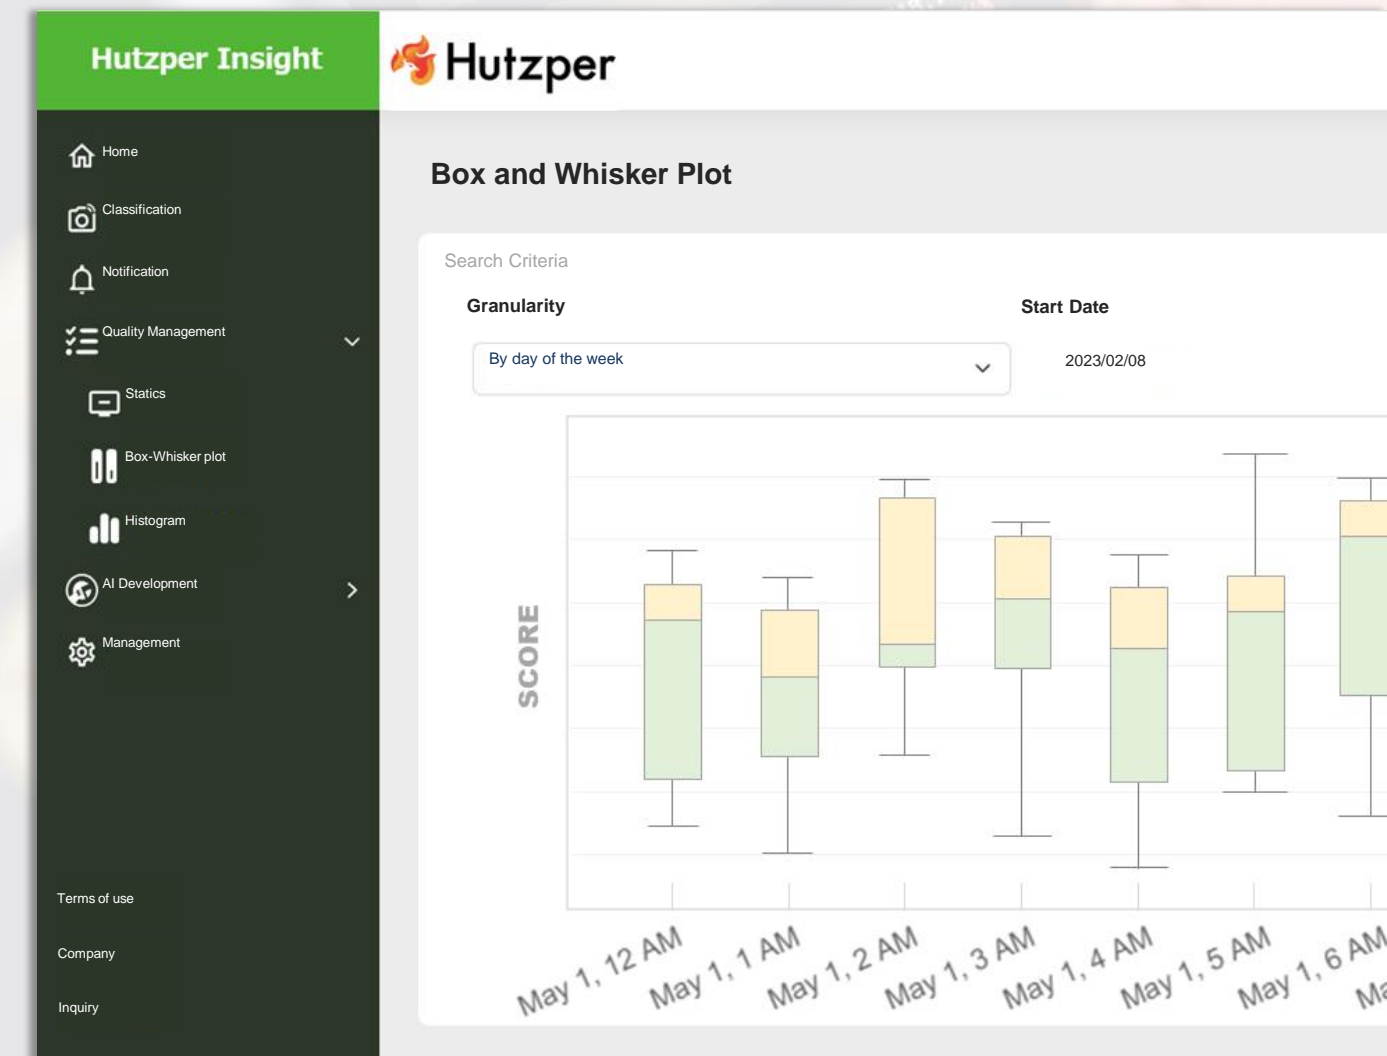

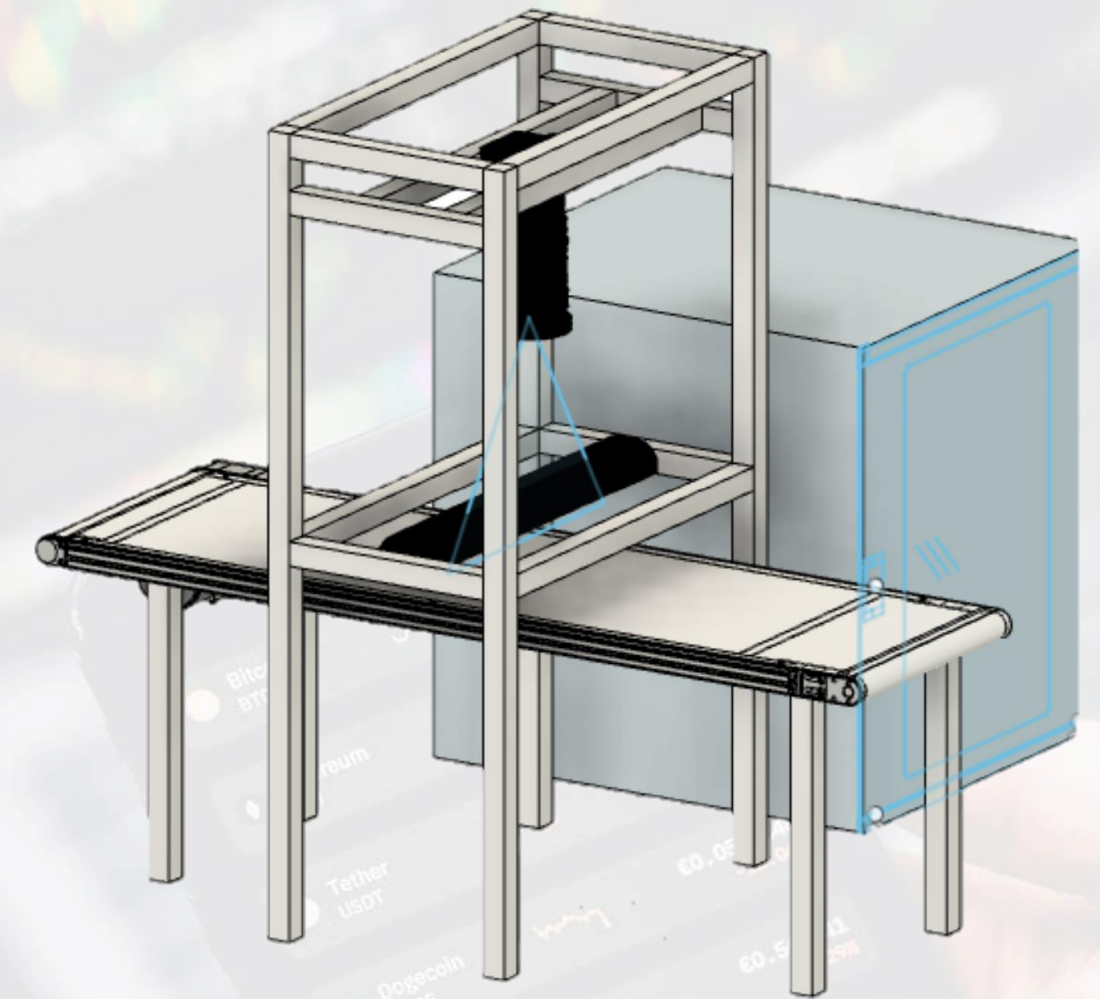

Higher skills demanded  
from labor

For your Visual Inspection,

We provide

**Inspection Equipment System  
with Quality Control SaaS**

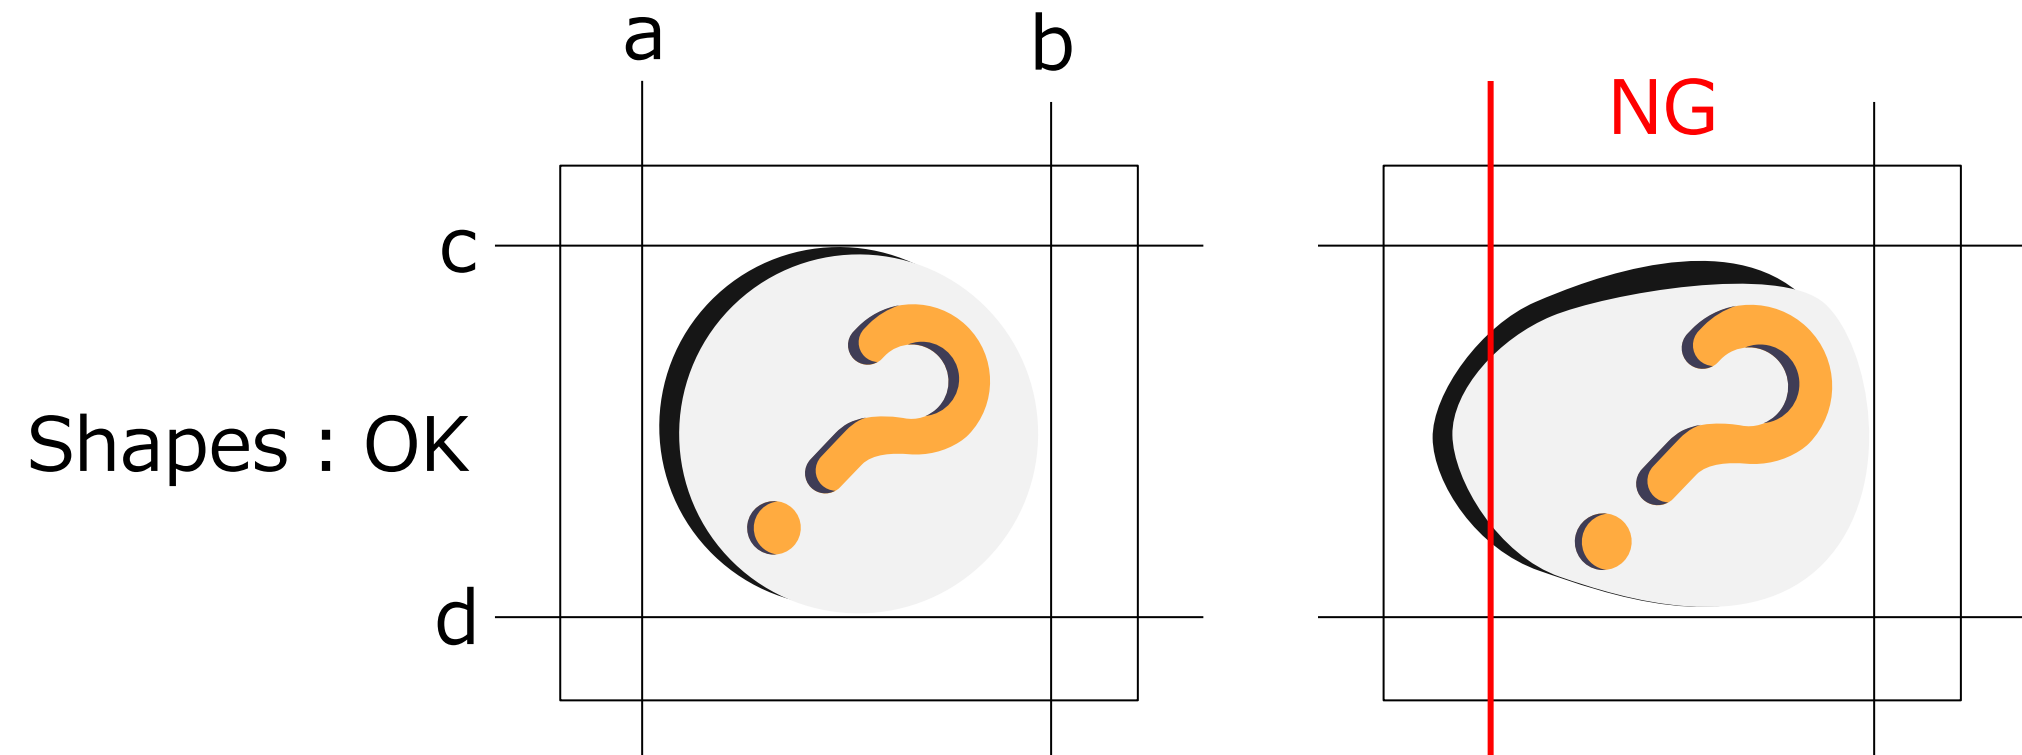

# Why Hutzper?

Competitive Advantages	
<b>Algorithm for inspection</b>	A unique algorithm specialized in inspection and quality control
<b>Comprehensive Support</b>	Supporting from optical design to AI construction seamlessly
<b>Patent of AI Learning</b>	Patent pending for AI's Re-Learning feature

# Inspection

## Differences

### Image Processing Sensors

# Hutzper

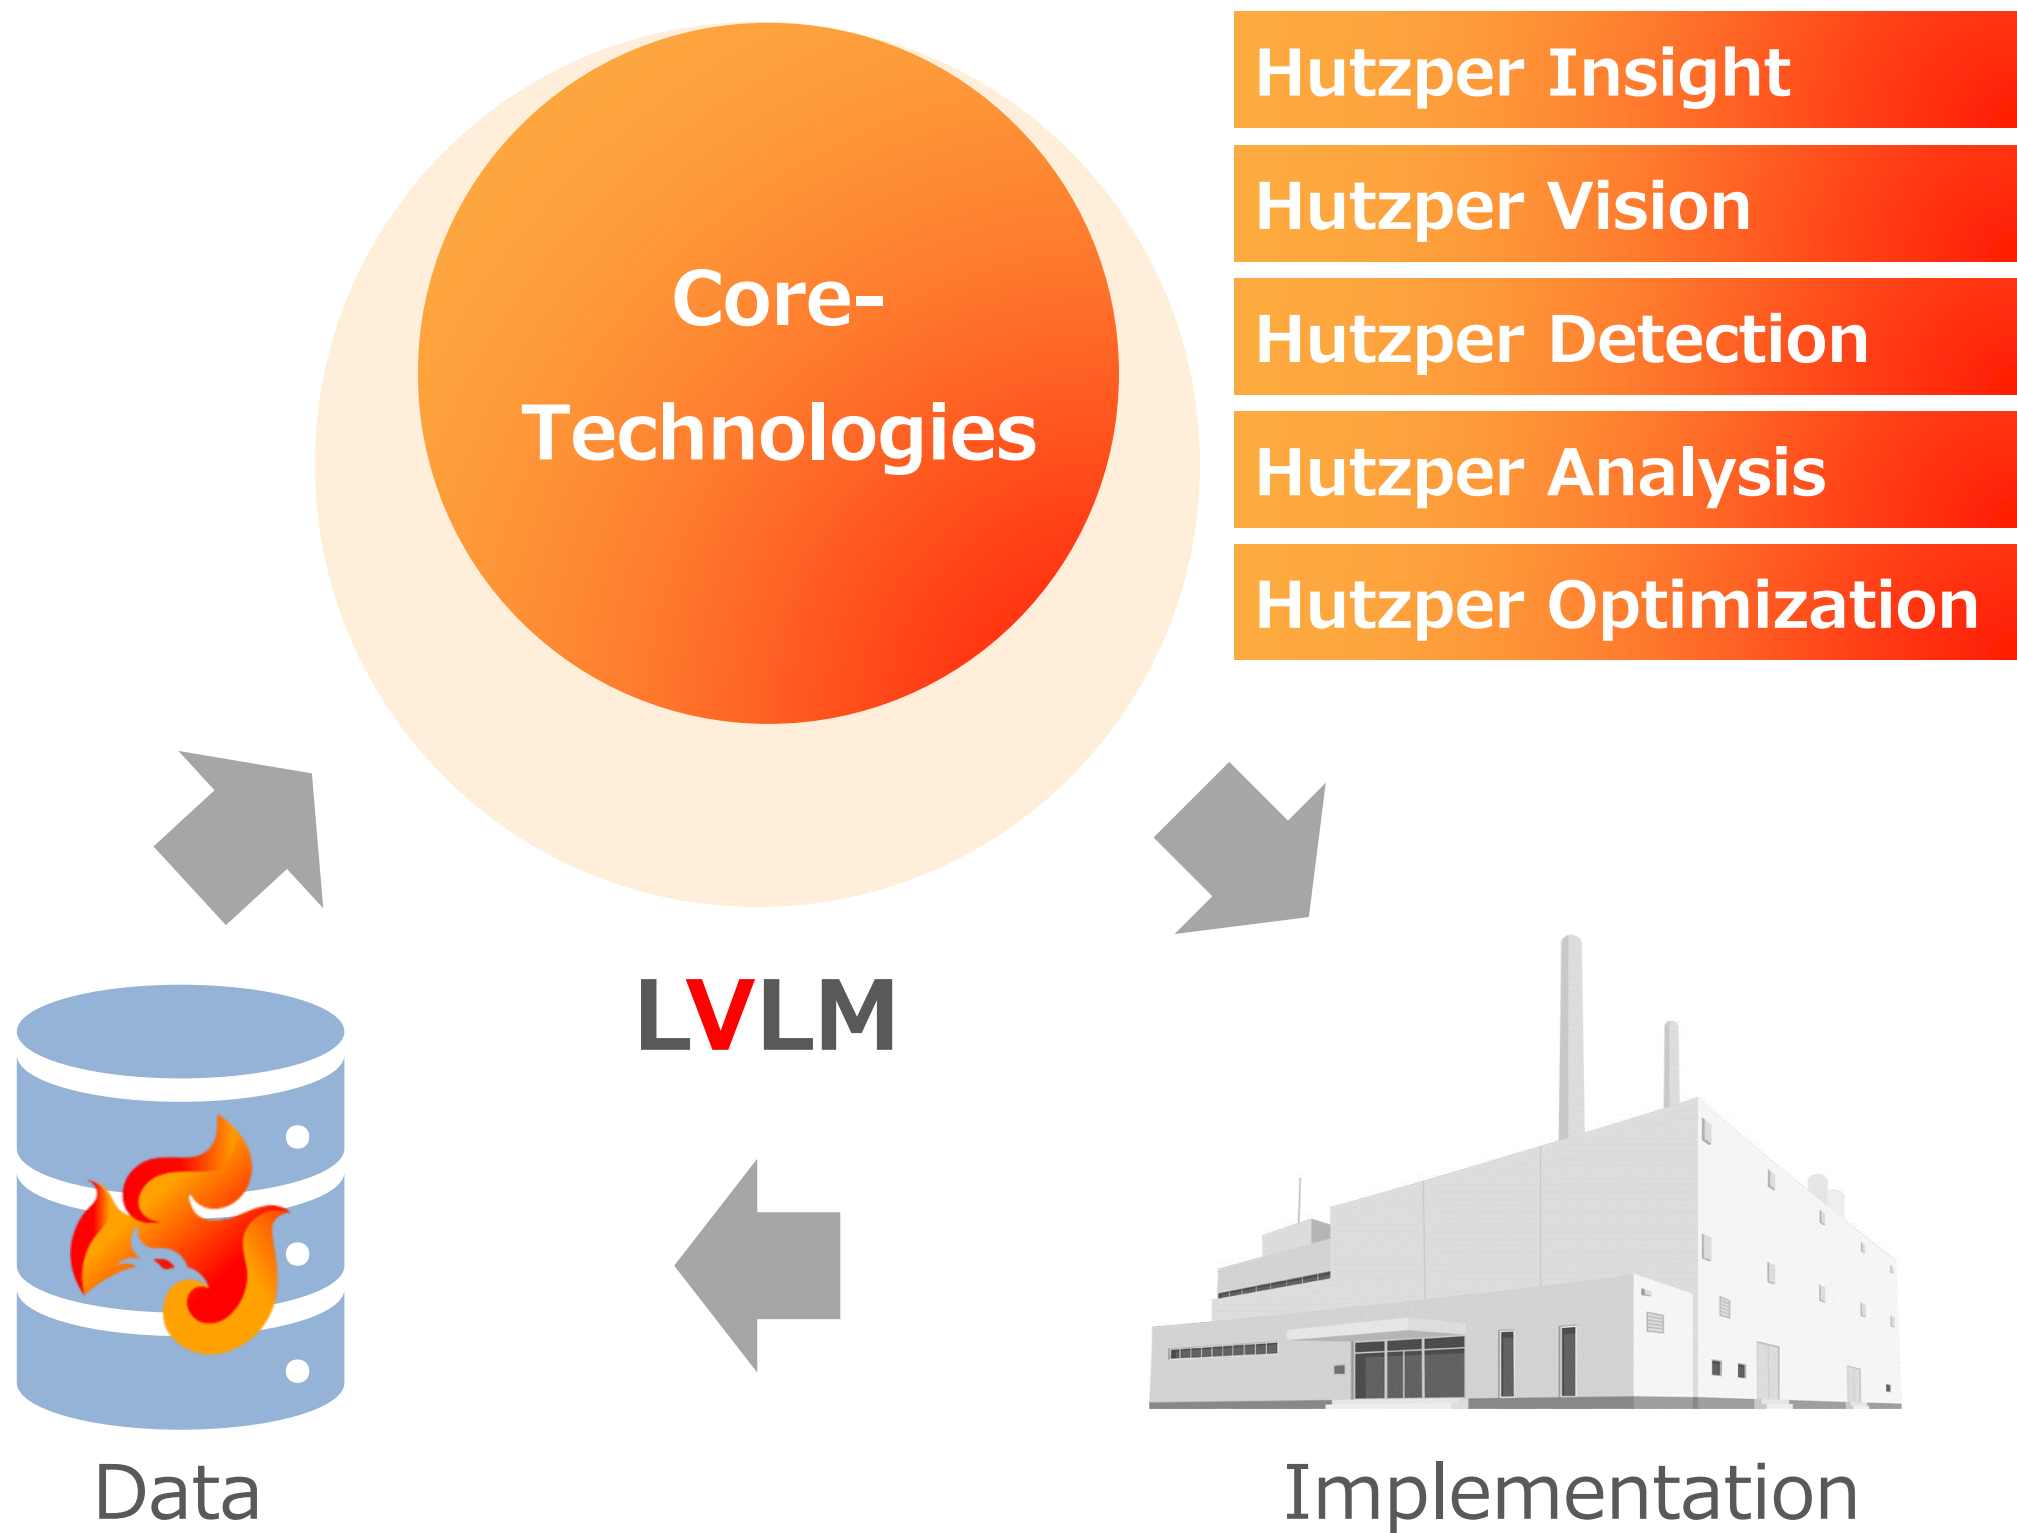

AI judgments based  
on past trends

Large-scale model  
for inspection

# Developing LVLM

From June 2023~

LVLM : Large **V**ision and Language Model

## Our AI Model

Using customer data, we develop  
the AI model specialized for the  
manufacturing industry

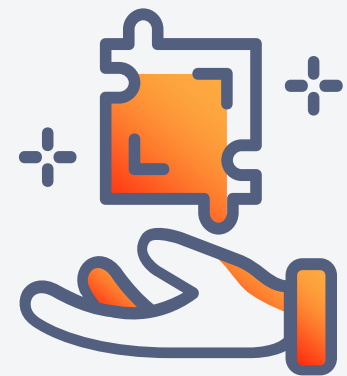

# Achievements

## Number of paid Contracts

**80 cases**

## Overseas Implementation

- **Germany**
- **Chile**

## Customers

## Partners

# Future Prospects

April 2020~ : Osaka Head Office

August 2022~ : Tokyo Branch

July 2023~ : Nagoya Branch

## Cross the border next!!

TAM ``Global

**20** billion dollars

TAM ``Japanese

**4** billion dollars

SAM ``Japanese

**1** billion dollars

SOM ``Japanese

**200** million dollars
